

# Environmental Specialist

## Position Specific Description

This position is within the corporate Environmental Services Department of NextEra Energy (NEE), supporting the East-West Tie Transmission Project in Northwestern Ontario, a build of approximately 280-mile (450-km) transmission line. We are looking for an individual to join this project through its duration. You will work with various individuals through the permitting and construction phases to ensure this is a success. Travel to project site areas is required as the ideal candidate would have to be in close proximity to the project area (Wawa to Thunder Bay, Ontario).

The applicant must have the ability to provide multifaceted and comprehensive environmental compliance support of construction projects, perform field assessments and site inspections, and prepare and review detailed environmental reports and permit applications. Applicant must have strong communications skills with the ability to interact effectively (email/phone/field/office) with internal management as well as local, state, and agency ministry representatives, internal and external subject matter experts, stakeholders, and environmental organizations in support of assigned projects. Experience working with ministries such as MECP and MNRF is highly desired for this role.

## Job Overview
